

**NOTICE OF INTENT TO ISSUE A
"PERMIT TO CONSTRUCT & OPERATE" PURSUANT TO RULE 212**

This notice is to inform you that the South Coast Air Quality Management District (AQMD) has received an application for permit to construct and operate a flexographic printing press at a location in your neighborhood. The AQMD is the air pollution control agency for all of Orange County and portions of Los Angeles, Riverside and San Bernardino Counties. Anyone wishing to operate, install or modify equipment that could be a source of air pollution within this region must first obtain a permit from the AQMD. Rule 212 requires the applicant for certain projects to distribute a public notice prepared by the AQMD prior to the issuance of a permit. This notice is being distributed due to the level of emissions.

The AQMD has evaluated the permit application for the following equipment and determined that the equipment will meet all applicable air quality requirements of our Rules and Regulations.

APPLICANT:	GEORGIA-PACIFIC CORRUGATED LLC
APPLICATION NO.:	498531
LOCATION:	6300 REGIO AVENUE, BUENA PARK, CA 90620
PROJECT DESCRIPTION:	INSTALL AND OPERATE A NEW FLEXOGRAPHIC PRINTING PRESS TO PRINT ON CARDBOARD

The flexographic printing process is a method of applying inks on a substrate such as paper to produce stock for cardboard boxes. This printing process uses water-based printing inks containing Volatile Organic Compounds (VOCs) which evaporate during the printing and drying operations.

The facility currently operates eleven flexographic printing presses under a facility-wide emission limit of 2700 pounds of VOC per month (approximately 90 pounds per day). The facility is proposing to add a new flexographic printing press under the same facility cap to have additional production flexibility. This project will not cause a net increase in the potential VOC emissions from this facility since the VOC emission limit is not changing. Our calculations show that a maximum of 90 pounds of VOC per day could be emitted into the air from the new press. Generally, the amount will be less as most facilities do not operate at their maximum potential. But even at the maximum amount, this project complies with all aspects of the AQMD's air pollution control requirements, including best available control technology.

The new printing press will emit small quantities of some toxic compounds from the inks. The AQMD has evaluated the short term (acute) and long term (chronic) health impacts associated with the maximum potential emissions. Using worst case conditions, our evaluation shows that the chronic and acute health risks are both well below our rule's toxic thresholds (below a Hazard Index of 1). According to the state health experts, a hazard index of one or less means that the surrounding community including the most sensitive individuals such as very young children and

the elderly will not experience any adverse health impacts due to the toxic nature of these emissions.

The air quality analysis of this project is available for public review at the AQMD's headquarters in Diamond Bar and at the Buena Park Library, 7150 La Palma Ave., Buena Park, California 90620. A copy of the draft permit can be viewed at www.aqmd.gov/webappl/PublicNotices/Search.aspx by entering the company's name. Information regarding the facility owner's compliance history submitted to the AQMD pursuant to California Health & Safety Code Section 42336, or otherwise known to AQMD, based on credible information, is also available from the AQMD for public review. Anyone wishing to comment on the proposed issuance of this permit should submit their comments in writing by July 24, 2009. If you are concerned primarily about zoning decisions and the process by which this facility has been sited at this location, you should contact your local city or county planning department. Please submit comments related to air quality to Mr. Shailesh Patel, Air Quality Engineer, Coating, Printing, Aerospace, & Metal Finishing Operations, Engineering and Compliance, South Coast Air Quality Management District, 21865 Copley Drive, Diamond Bar, California 91765-4178.

For your general information, anyone experiencing air quality problems such as dust or odor can telephone in a complaint to the AQMD by calling 1-800-CUT-SMOG (1-800-288-7664).
